

*Space is limited at some locations.
Register today and make sure you
receive this required training!*

MPGA's state-certified Dispensing Propane Safely class is based on a nationally recognized curriculum, instructor's experience, and applicable codes and regulations. Employees you send to Dispensing Propane Safely are your best protection against accidents.

Register today for the Dispensing Propane Safely class of your choice. Some sites fill up quickly, so submit your registration now.

Included in the class fee are training materials, lunch and refreshment breaks. In addition, buying NFPA's Pamphlet 58 is *optional* for this course and should be used for reference on the job. If you have a copy, you're welcome to bring it. If you need a copy, you may purchase one when you register.

Registrants must be in attendance for the entire session and pass the final test with a 75% in order to be certified.

Dispensing Propane Safely

The Missouri Propane Gas Association is proud to offer the 2022 Spring schedule for Dispensing Propane Safely Training. Training sites are located conveniently throughout the state.

Missouri's state regulations governing propane requires that anyone dispensing propane receive state certified propane safety training as soon as the training is available in their area. It is also required that anyone dispensing propane have training every three years and the recurring training must also be a state certified program. It is illegal for any person not so trained to operate the dispensing device. It is also the responsibility of the owner or manager where the dispenser is located to see that all the employees that operate the dispenser receive state certified training every three years.
