

The **Propane-Specific Haz Mat Training** class is designed specifically for propane industry owners, CEOs, safety directors, driver trainers, office personnel, and personnel involved in shipping and transporting hazardous materials.

The hazardous materials regulations require that each HM employee be trained and tested within 90 days of employment. In addition, each employer must certify that their employees receive Haz-Mat training every three years.

The regulations require that the training include general awareness and familiarization training, function specific training, security awareness, in-depth security, and safety training. **Training must include editorial changes and amendments that have been made to the regulations.**

CDL Hazardous Materials Endorsement *does not satisfy* the training requirement. Failure to comply with this regulation may result in civil penalties of up to \$27,500, but not less than \$275 per day.

Registration includes: the cost of student and test materials, pencils, markers, and refreshments. Other meals, lodging and travel are not included in the class fee.

Haz-Mat Training Topics:

- Who must be trained?
- Training categories
- Training deadlines
- Hazardous materials definition
- Hazardous materials table and special provisions
- Hazard communications regulations

Propane-specific Haz-Mat Training

To assist propane marketers and personnel with this regulation, the Missouri Propane Gas Association is sponsoring a Propane-specific Haz-Mat seminar.
